PROFILE

Computer Science Engineering graduate and Full-Stack Developer with hands-on experience building responsive web applications using JavaScript, React.js, Node.js, Express.js, MongoDB, SQL, HTML, and CSS. Experienced in developing REST APIs, CRUD applications, database-driven systems, and responsive user interfaces. Strong understanding of Git, GitHub, debugging, API integration, and software development practices. Seeking entry-level opportunities as a Software Engineer, Full-Stack Developer, Frontend Developer, or JavaScript Developer.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering 2022 – 2026
Veer Madho Singh Bhandari Uttarakhand Technical University

Senior Secondary (Class XII) 2021
Board of School Education, Uttarakhand
M.P. Hindu Inter College Ramnagar

Secondary (Class X) 2019
Board of School Education, Uttarakhand
M.P. Hindu Inter College Ramnagar

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: HTML5, CSS3, React.js, Next.js

Backend: Node.js

Databases: MongoDB, SQL

APIs: REST APIs, CRUD Operations

Tools: GitHub, VS Code,

Concepts: Object-Oriented Programming, Data Structures, Debugging, Responsive Web Design

WORK EXPERIENCE

Full Stack Intern | The Developers Arena July 2026 – August 2026

- Developed 4+ full-stack web applications using JavaScript, React.js, Node.js, and MongoDB, implementing responsive user interfaces and backend services.
- Built and integrated 10+ REST API endpoints with Node.js implementing CRUD operations and connecting applications with MongoDB.
- Managed 5+ development projects using Git and GitHub, maintaining version control, structured commits, and collaborative development workflows.
- Completed weekly technical assignments focused on full-stack development, Java programming, and problem-solving.
- Strengthened debugging, modular programming, and clean coding skills.

PROJECTS

Real-Time Chat Application

React, Node.js, Express.js, Socket.IO, MongoDB

- Developed a full-stack real-time chat application using React, Node.js, Socket.IO, and MongoDB Atlas.
- Implemented real-time messaging, online user presence, typing indicators, and automatic reconnection using Socket.IO.
- Built REST APIs for message management and integrated MongoDB Atlas with Mongoose for persistent chat history.
- Designed a responsive frontend using React, Vite, CSS3, and Socket.IO Client for seamless client-server communication.
- Deployed the frontend and backend on Render, enabling production access to the application.

AI Document Summarizer

Python, AI, HTML, CSS, JavaScript

- Developed an AI-powered document summarization application for processing PDF, DOCX, and PPTX files.
- Implemented document upload and text extraction workflows to process content from multiple file formats.
- Integrated AI-based text summarization to generate concise summaries from uploaded documents.
- Designed a web-based interface using HTML, CSS, and JavaScript for document upload and summary presentation.

Matrimonial Matchmaking Platform

Full-Stack Web Application

- Developed a full-stack matrimonial matchmaking platform with user profile management and matchmaking functionality.
- Implemented CRUD operations for managing user profiles and application data.
- Developed backend services and REST APIs to handle client-server communication and application workflows.
- Integrated database functionality for persistent storage and retrieval of user information.
- Designed responsive web interfaces to improve usability and user experience across different screen sizes.

Library Management System

Java, Object-Oriented Programming, Collections, File Handling

- Developed a console-based Library Management System using Java for managing books and member records.
- Implemented CRUD operations, Java Collections, and object-oriented programming principles including encapsulation and modular class design.
- Implemented file handling for persistent data storage with input validation and exception handling.

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation (Forage)

Completed a virtual job simulation focused on data analytics and business problem-solving. Analyzed datasets, interpreted insights, and applied data-driven decision-making techniques.

Datacom Software Development Virtual Experience Program (Forage)

Performed software debugging, code analysis, and feature enhancement tasks. Worked with JavaScript, React, and developer tools in a simulated development environment.
